FLEXIBLE MANAGEMENT

The Portfolio may invest in obligations of U.S. and non-U.S. issuers, including corporate bonds, convertible securities, preferred stock, commercial paper, securities issued or guaranteed by the U.S. government, its agencies or government-sponsored enterprises, similar obligations of non-U.S. government or supranational entities, bank obligations such as certificates of deposit, time deposits, bank notes and repurchase agreements. Such investments may be in “investment grade” or “below investment grade” bonds (“high yield” or “junk” bonds) and may be denominated in U.S. dollars or foreign currencies. Up to 50% of the Portfolio may be invested in bonds rated below investment grade at the time of investment.

NO FIXED DURATION

Versatile Bond Portfolio may invest in bonds with a range of maturities from short- to long-term and does not attempt to maintain any pre-set average portfolio maturity or duration, but rather seeks to manage the Portfolio’s duration based on the investment adviser’s forecast of interest rates and assessment of general market risks.

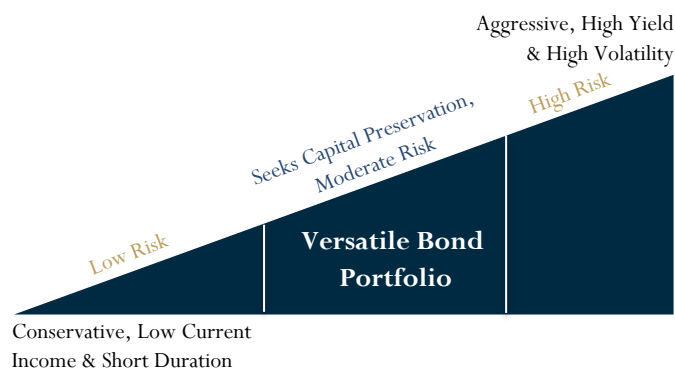

SEEKS TO EARN HIGH CURRENT INCOME

In pursuit of its investment objective, under normal market conditions Versatile Bond Portfolio invests at least 80% of its assets in bonds, which may include debt securities of all types and of any maturity. This provides the Portfolio with flexibility to invest in a wide range of bonds, take advantage of opportunities in the bond market, and thus may provide attractive returns to shareholders over the long term.

TAKES A DIFFERENT APPROACH

Focus at all times is on strong credit quality, active spread and duration management, and opportunistic pursuit of undiscovered and undervalued debt securities within well-known industries and sectors.

- ✓ Invests opportunistically
- ✓ Active credit risk management
- ✓ Flexible duration
- ✓ 50% investment grade at all times

STANDARD & POOR’S CREDIT QUALITY (%)

As of June 30, 2022

Versatile Bond Portfolio’s investments in debt securities typically decrease in value when interest rates rise. The risk is usually greater for longer-term debt securities. Investments in below investment grade bonds (also referred to as “high yield” or “junk” bonds) present a greater risk of loss to principal and interest than higher-rated securities. Investments in foreign securities involve greater volatility and political, economic and currency risks, and differences in accounting methods. These risks are greater in emerging markets. In addition, certain investments may be illiquid and may be difficult to purchase, sell, or value.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Investment performance, current to the most recent month-end, may be lower or higher than the performance quoted. It can be obtained by calling (800) 531-5142. Performance data shown with load reflects the Class A shares maximum sales charge of 4.00% and the Class C shares maximum deferred sales charge of 1.00%. Performance data shown as no load does not reflect the current maximum sales charges. Had the sales charge been included, the Portfolio's returns would be lower. All results are historical and assume the reinvestment of dividends and capital gains. Inception date for Class I shares was September 27, 1991. Inception date for Class A shares and Class C shares was May 31, 2016. Pursuant to an Advisory Fee Waiver and Expense Assumption Agreement effective through June 1, 2023, the Portfolio's investment adviser has contractually agreed to waive a portion of its Management Fee payable by the Portfolio so that the Management Fee paid by the Portfolio does not exceed an annual rate of .6250% of the Portfolio's average daily net assets. The Agreement may be terminated or amended only with the approval of the Fund's Board of Trustees. strategies prior to May 30, 2012. Bloomberg Capital Global Aggregate (Excluding Securitized) Bond Index commenced on September 30, 2002. Returns presented, which include periods prior to September 30, 2002, are calculated using the return data of Bloomberg Capital Global Aggregate Bond Index through September 29, 2002 and the return data of Bloomberg Capital Global Aggregate (Excluding Securitized) Bond Index since September 30, 2002. Bloomberg Capital Global Aggregate Bond Index is a market-capitalization weighted, broad-based securities index measuring the global investment grade fixed-rate debt markets. Bloomberg Capital Global Aggregate Bond Index measures a wide range of global government-related, treasury, corporate, and securitized fixed-income investments. Bloomberg Capital Global Aggregate (Excluding Securitized) Bond Index is a sub-index of Bloomberg Capital Global Aggregate Bond Index and excludes securitized fixed-income investments. FTSE BIG Credit AAA/AA 1-3 Year Corporate Bond Index and FTSE BIG Credit A 1-3 Year Corporate Bond Index are components of FTSE Broad Investment-Grade (BIG) Bond Index, which is an unmanaged, capitalization-weighted index of investment-grade fixed-income securities and is generally considered representative of the U.S. Bond market. Returns shown for these indices reflect reinvested interest, dividends and other distributions as applicable, but do not reflect a deduction for fees, expenses or taxes. Indices are unmanaged and are not subject to fees and expenses. You cannot invest directly in an index.

The chart illustrates the performance of \$10,000 invested in Versatile Bond Portfolio Class I shares five years ago compared to performance of the Bloomberg Capital Global Aggregate (Excluding Securitized) Bond Index over the same period. It does not reflect the deduction of taxes an investor would pay on fund distributions or on the redemption of fund shares. Returns for Versatile Bond Portfolio Class I reflect reinvestment of all dividends and distributions and deduction of all fees and expenses. **Past performance does not guarantee future results.** SEC Standardized Yield is based on a thirty-day (or one month) period and is computed by dividing the net investment income (i.e. dividends and interest earned during the period less expenses accrued for the period, net of reimbursements) per share earned during the period by the net asset value per share on the last day of the period, using the average number of shares outstanding during the period and then annualizing the result. Subsidized Yield reflects voluntary fee waiver. Alpha is the mean of the excess return of the manager over beta times benchmark. Beta is a measure of systematic risk or the sensitivity of a manager to movements in the benchmark. Sharpe Ratio is a risk-adjusted measure of return, which uses standard deviation to represent risk. Standard Deviation measures the average deviations of a return series from its mean and is often used as a measure of risk. A large deviation implies there have been large swings in the return series of the manager.
